Resume (Word)

## The Intersection of Visual Craft & Advanced Automation

15+ years of experience engineering brand identities, high-converting executive pitch decks, and cross-channel digital campaigns. Backed by postgraduations in UX and Front-End Development, alongside deep training in Technical AI Systems (Machine Learning, Computer Vision, and LLM Orchestration). I build efficient, scalable creative production pipelines that slash asset lifecycles by 75% while preserving strict brand parameters.

## Selected Strategic Work

### B2B International Campaign & Pitch Architecture

BRAND STRATEGY • SLIDE DESIGN • AI AUTOMATION

#### THE BUSINESS CHALLENGE

An international corporate sales pipeline required a complete overhaul of premium sales presentations, pitch decks, and cross-channel assets under highly accelerated operational timelines.

#### STRATEGIC WORKFLOW & TECHNICAL EXECUTION

Integrated custom generative AI prompt frameworks (Midjourney/Stable Diffusion) to compress visual storyboard concepts down to a single afternoon. Transformed concepts into flawless vector elements, high-end typography layouts, and interactive components within Figma and Adobe Creative Suite.

#### MEASURABLE OUTCOME

Successfully boosted international proposal conversion rates by 29% and reduced production asset lifecycles by 75%.

# Global Brand Book & Identity Systems

VISUAL IDENTITY • BRAND SYSTEMS • UX PROTOTYPING

## THE BUSINESS CHALLENGE

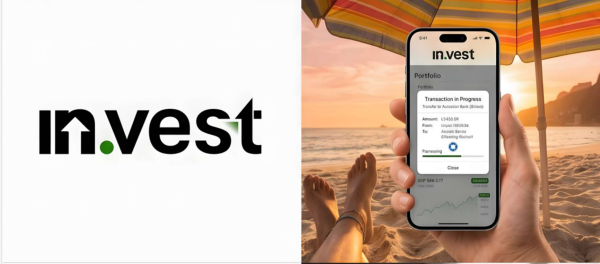

Designing scalable, comprehensive corporate identities, logos, and rigid visual usage manuals for fast-moving tech startups and international institutions.

## STRATEGIC WORKFLOW & TECHNICAL EXECUTION

Translated complex business models into clean interactive visual systems within Figma, ensuring all creative assets mapped seamlessly to modern front-end responsive grid layouts and strict accessibility parameters.

## MEASURABLE OUTCOME

Deployed 50+ successful visual identity and digital system manuals across diverse sectors.

# Creative Design Operations & GenAI Pipelines

ADVANCED WORKFLOWS • LOW-CODE N8N • COMPUTER VISION

## THE ARCHITECTURE

A specialized display of how technical AI engineering multiplies design output. Combines core design fundamentals with model orchestration via LLMs, Stable Diffusion asset tweaking, and automated audio/video synthesis tools.

## TECHNICAL EXECUTION

Leveraging low-code automation tools (n8n/MCP) and computer vision principles to build asset-generation flows that give corporate teams elite velocity. Proves that AI is treated as a programmatic efficiency engine under the absolute creative control of a veteran designer.
